Code construction methods of α -codes

S. Jain* and G.C. Petalcorin, Jr.

Abstract. α -codes or equivalently codes in α -metric are block metric codes and are a generalization of the classical Lee metric codes [2-6] and has applications over non-binary channels. In this paper, we present the code construction methods of α -codes in terms of their parity check matrix.

AMS Subject Classification (2020): 94B05
